Art Unit: 3682

Claim 76 is rejected under 35 U.S.C. § 112, first and second paragraphs, as the claimed invention is not described in such full, clear, concise and exact terms as to enable any person skilled in the art to make and use the same, and/or for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The reference to "D>P" is new matter unsupported by the oath in the original parent case.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. § 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 76, as understood and to the extent definite, are rejected under 35 U.S.C. § 102(b), as being anticipated by Takamizawa '198. The examiner finds all claimed subject matter to be present.

See Fig. 1.

The drawings must show the claimed tapered bearings and pitch circle.
